I am linuxer, Reading paper just so boring, I can't bear it any more!!!

- How to take the word that i want?
- How to translate it?
- How to show it?

- 剪切板取词
- OCR取词
- 语音取词

剪切板取词

```
if event.type == X.ButtonRelease:
pipe = os.popen("xclip -o")
text = pipe.readline()
pipe.readlines()
pipe.close()
print "您选取的是: ", text
```

What problems exist ?

- 如何提取翻译正文(有道广告不错，就是把译文挡住了，)
- 添加其它字典(侧边栏,ok？)
- 如何防止用户刷屏(管道原来可以这样用～～～)
- 离线字库(还是先人肉吧)
- 如何退出程序(玩一把汇编～软中断)
- 刷新取词结果
